Activity Instructions with Solutions

Attach the answer to Exercise 3 of chapter 3 in the textbook (page 217) to this assignment as a text (dot txt) file and send it back before the deadline. Your answer should consist of a short list of items in the proper order. The question is reproduced here with the solution:

Suppose that you have the following **Vector** object list (see the text on type Vector or the Java API documentation):

list = ["One", "Two", "Three", "Four"];

What are the elements of list after the following statements execute?

list.addElement("Five");   → ["One", "Two", "Three", "Four", "**Five**"]
list.insertElementAt("Six", 1);   → ["One", "**Six**", "Two", "Three", "Four", "Five"]
